ABSTRACT

This report consists of computer printouts of statistical data compiled from state annual reports for the 1971 fiscal year. Tables present data by state relating to funds and expenditures for vocational education, number of vocational education teachers and their training, enrollments in various programs, and placement of program completions. These state data should be useful in assessing the scope and progress of vocational education in the United States, particularly for those concerned with planning. (MF)

FOREWORD

Fiscal year 1971 was the first full year of operation under the Vocational Education Amendments of 1968; and as a result, significant changes and improvements in vocational and technical education became evident. This report, the third in the "Vocational Education Information" series for fiscal year 1971, consists of computer printouts of statistical data compiled by State from State annual reports.

The series of State-by-State tables include 24 relating to expenditures, 3 relating to number of teachers, 1 dealing with teacher training, 21 relating to enrollments in various programs, and 4 relating to placements of program completions. It should be noted that certain tables cannot be precisely compared due to rounding into thousands and the inability of a few States to supply the detailed data. Fiscal data are subject to audit and are to be considered provisional.

Due to changes in reporting requirements and new legislation, some of the statistics are not necessarily compatible with those published in previous years. However, the State data should prove useful to all persons interested in assessing the scope and progress of vocational education in the United States and particularly those individuals who are concerned with planning.
